Profile

“Self-Motivated Young Developer with passion to progress with the industry”

I have some experience developing and designing for the web, from simple landing pages to responsive websites. I strive to create software that not only functions efficiently under the hood, but also provides intuitive, pixel-perfect user experiences. I love learning new and better ways to create seamless user experiences with clean, efficient, and scalable code. I'm always looking for opportunities to work with those who are willing to share their knowledge as much as I want to learn.
